Mississippi River Setting In Gym

The annual Bay High Festival, held in the gymnasium of the school May 1, was a most beautiful and picturesque scene to old southerners and especially to Mississippians. Miss Norma Johnson and Sam Vaughn were May Queen and King.

Maid and duke of honor were Faye Rouchon and Penny Cole. One end of the gym was converted into a realistic show boat. The boat was docked at the river bank, amid a profusion of magnolias, water lilies and iris surrounding the bank.

At the blast of the trumpet, the heralds entered and took their places on each side of the throne, which was on the floor of the gym, a little distance from the river scene.

The queen wore a white organdy dress and train set off by her bouquet of American beauty roses. Dressed in deep rose red net, and carrying a bouquet of white roses and daisies, the maid of honor preceded the queen into the hall.

The entertainment for the court was one of the most enjoyable. events of the program. Billy James, representing an old darky and

If elected, I promise to do everything in my power to carry out the policies and program which I advocate and will devote my FULL TIME to the carrying out of the duties and responsibilities of the office.

Some Facts The Pictures Failed To Show

Last week Commissioners Glover and Ladner published a pictorial review of their self-styled "progressive" accomplishments. But here are some facts they failed to bring to the at-

FIRE ENGINE: The new fire truck cost approximately \$13.250.00. Of that amount only \$2,500.00 has been paid. This \$2,500.00 was received from the State of Mississippi to be used for no purpose other than to purchase fire-fighting equipment. The balance on the new truck is still unpaid and will be paid over a period of the next four years. The City HAD to buy a new truck. It was not the "progressive" spirit of the two Commissioners that prompted its purchase. Prior to its purchase, the Commissioners rented a fire truck from Keble College, Pass Christian, and paid them a rental of \$80.00 monthly for a period of about six months. Keble College insisted on a return of their fire truck and so the Commissioners were forced to buy new equipment.

SCHOOL CONSTRUCTION: We do have a School Board in the community even though Commissioners Glover and Ladner seem inclined to have the public believe that the Commissioners have been the guiding factor in this new construction. The School Board, along with the City Superintendent of Education, are the official policy making group for City schools. It is the School Board and the City Superintendent of Education who are to be given credit for this new construction and not any member or members of the City Council. Mr. Glover and Mr. Ladner should stick to their own meager accomplishments and not attempt to steal the accomplishments of other groups in the community.

PARKS AND PLAYGROUNDS: We also have a Parks and Playgrounds Commission. It was created by act of the 1950 Mississippi Legislature and is made up of five members appointed by the City Council. To date (and when the 1952 taxes will have all been collected) the taxpayers will have paid approximately \$20,000,00 towards the parks and playgrounds in the community. Mr. Ladner and Mr. Glover should again hold to their own few accomplishments and give credit

STREET MARKERS: Early in 1949 (before Mr. Glover's election and his subsequent "yes, yes, yes" to everything Mr. Ladner wants), I had the same company with the very same equipment give a demonstration of the street marking equipment sold by them. After Mr. Glover's election it was useless for me to try to buy this equipment. It would have been voted against. In the meantime, the Garden Club for at least two years has been prodding the Council for some kind of street markers. Now, a few weeks before the election, these self-styled "progressive" Commissionesr have given us the new

STREET WIDENING: Four years ago a civil engineer was employed to set out markers for the widening of Front Street beween Main and deMontluzin Streets. That project also fell through after Mr. Glover's election. Now four years later a few weeks before the election, Mr. Ladner and Mr. Glover decide to do the job.

STREET SURFACING: Any man who knows anything at all about streets will tell you that the money spent on the hardsurfacing program was tax money wasted. The Commissioners were interested in securing for themselves as many votes as they possibly could and so they did a bit of "winnow dressing." They gave quantity instead of quality, Already these streets where traffic is heavy have been patched and re-patched. The edges or shoulders of these streets have already begun to crumble and break. Holes have appeared in numerous places. Regardless of the consequences and only for the purpose of making a good impression at election time, the Commissioners poured the taxpayers' money into this cheap blacktopping program.

BOND ISSUE WITH NO INCREASE IN TAXES: Consider the Commissioners' boast on this subject carefully. It is a fraud being committed upon the people in a subtle manner. Here is how the "bond issue with no increase in taxes" actually takes place: Maturities of certain old bond issues have recently been liquidated. This would have resulted in an elimination of that tax from the present levy. Now these new issues must be provided for and so the same levy paid by the taxpayer to pay the maturities of the old bond issue will now remain in effect. No increase in taxes but no de-PURCHASE OF SCHOOL LOT: The Commissioners do

not state that the PTA on several occasions had to prod them into action on the purchase of this lot. They do not tell the public that the owner had to give notice after such a long time of waiting for the Commissioners to make a decision that unless the Commissioners bought the property within a certain length of time that he would be forced to sell to some individual. They do not tell the public that because they quibbled about the price with the owner that part of the property which rightfully shoulld have been purchased for school use was finally sold to an individual to contruct an

Nor do they tell the public that they waited so long to make the purchase that when they were fully forced by the PTA and other individuals to buy the land that the price of the property which rightfully should have been purchased cause of the "progressiveness" of these two Commissioners.

Very respectfully submitted,

Warren Carver

ECONOMIC STRENGTH, KEY

The readers of this column and those familiar with our record in the Congress for the past several years will recall that we have laid down two basic principles: First that the Russian leaders

want neither war nor peace, but hope to bleed us economically white and take over in the result ant confusion and chaos.

And, second, that if we are to survive the objectives of the Soviet, we must get our financial house in order, balance the budget, and half the frend toward National bankruptcy.

It is obvious, therefor, that we and those who feel as we do about the situation welcome the statement of President Disenhower that he has cut 84, billion dollars from the Truman budget request: and his further statement that military and foreign aid cuts can be made without jeopardizing the defense of the country.

In other words, the President evidently realizes the true objectives of Russia and sees no imminent threat of an all-out war. It is further evident that he believes in the thought so often advanced by us that the real danger to the our economy by deficit spending. It all reminds me of the interview that I had with him when he was still the Commander in Chief of our Armed Forces in Frankfort Germany in 1945. Then I asked him what he thought the chances were for Germany to go Communist. He replied that "a hungry belly didn't care what type of

Government it lived under. His latest statement the other day in discussing the necessity for economy in Government is in line with that statement made to me in 1945. He said in part:

. I have always firmly be lieved that there is a great logic in the conduct of military affairs. There is an eqully great logic in economic affairs. If these two logical disciplines can be wedded, it is then possible to create a situation of maximum military strength

within economic capacities. "If, on the other hand, these two are allowed to proceed in disregard one for the other, you then create a situation either of doubtful military strength, or of such precarious economic strength that your military position is in constant jeopardy... Even with the 814 billion cut

HERE IS FURTHER PROOF WHY One Good Term Deserves Another

We, as your City Commissioners for the past four years, feel that one of the greatest services rendered to the City of Bay St. Louis is restoring the City to a sound financial basis. We feel that the present and future progress of the City depends upon its sound financial structure.

No industries or investors, individual or corporation, will go to a city which does not have a sound financial structure. Individuals and corporations will not invest in a city which

is on a shakey financial structure. This is the primary question raised by any investor in any community, whether it be a small or large investor - be it an industry, a home-builder, or prospective citizen.

During the past four years, we have done everything possible to attain this goal, and our record speaks for itself.

But if YOU, the people, are not satisfied with our statement, then we offer to you excerpts from a statement of M. A. Saunders & Company, of Memphis, Tennessee, one of the largest purchasers of Municipal Bonds in the South. Its statement is

"The City of Bay St. Louis owns its Gas Distribution System, the net earnings of which are more than ample to take care of maturing principal and interest on the Gas System

Bay St. Louis owns its own Water System, which has an estimated value of \$400,000. The system is debt free, there being no waterworks revenue bonds of the City out-

"When the PRESENT ADMINISTRATION took office on January 1, 1949, the total bonded indebtedness was \$221,-000. This has been reduced to \$97,000 through taxes, and no refunding of bonds.

"FEW MUNICIPALITIES IN MISSISSIPPI CAN SHOW THE RELATIVE FINANCIAL STATEMENT OR PRO-GRESS WHICH BAY ST. LOUIS SHOWS."

The above excerpt is a statement made by this Bonding Company, which statement will be distributed throughout the United States. There is no better advertisement for any city than that above. This is the highest recommendation any city can receive from an investment standpoint.

Your City has made rapid strides in the past four years, AND WITHOUT ANY BONDED INDEBTEDNESS, except for the recent school Construction Program which was requested by seventy-five percent of the qualified electors, all of these improvements having been accomplished with a REDUCTION IN

We feel that we, by our works and efforts in your behalf, deserve another four-year term.

Again We Say:

"ONE GOOD TERM DESERVES ANOTHER" RE-ELECT SYLVAN J. LADNER, JR. AND J. CYRIL GLOVER AS YOUR TWO COMMISSIONERS ON TUESDAY, MAY 12, 1953

STATE HEALTH

OFFICER SAYS To obtain the greatest benefit from the best treatment for canbe made at an early stage of the disease. The concept of early diagnosis has changed recently Some good scientific investigators feel that cancer can be reached by therapy at its pre-investi-gative stage; that is, before it actually exhibits, any physical manifestations that would be noticeable. The fact is that the development of recent diagnosis techniques has definitely improved the lot of the cancer patient. Many investigators have explored area of educational television. the possibility of a blood test fact there is no blood test for the tem of Houston, Texas. accurate in specific instances. will preside. There is a wide variety of other tests that would perhaps be just as useful and desirable. Physical and chemical analysis of other body fluids are being investigated. It must be remembered, however, that not many of the tests arrord

It is a misconception held by many that cancer is an incurable disease. The publication of factual data regarding cancer in its various forms has accomplished much in getting over to our citizens the fact that cancer is often a curable disease, but that it is necessary to have an early diagnosis and scientific treatment at the hands of physicians who know the latest and most effective treatment for cancer and are given the opportunity to apply such treatment following early diagno-

à clear-cut, definite diagnosis of

cancer, but some of them do identify malignant tumors in people prone to develop cancer. In conjunction with perodic and thorough physical examinations by cancer conscious physicians, some of these tests offer the hope of early diagnosis of cancer, which is necessary for a cure of the dis-

Until a short time ago Mississippi-was almost exclusively agricultural; 83 percent of her people were engaged in farming pursuits, primarily in the cultivation of cotton. Except for timber and lumbering, this was a one-crop state. Mechanization and diversification are now revolutionizing her agriculture and her economy.

While her farmers break all records in cotton yield per acre, Mississippi increased her cash income from poultry 1.000 percent in four years—poultry raisers received \$40,000,000 in 1952. Mississippi's rich Delta now has 30,000 acres in rice, her Gulf Coast country 65,000 acres in tung nut trees and the production of livestock and milk are on the increase.

Mississippi at long last also comes into her own, industrially. She already ranks ninth among the states in the production of oil, and her petroleum and gas potentialities have hardly been tapped. The construction or expansion of eleven chemical plants is underway at a cost in excess of \$34,000,000.

The Mississippi Gulf Coast has become a major winter-summer resort as millions go on annual vacations. Along this semi-tropical, four-season strand

STRENGTH

a four-lane highway is being completed, two bridges constructed, spanning the Pascagoula River and the Bay of St. Louis. A 26-mile man-made sand beach has been provided.

A well-diversified area, the Mississippi Gulf Coast becomes one of the nation's foremost expanding workshops and playgrounds. There is the ocean harbor at Gulfport, Ingalls Shipbuilding Plant at Pascagoula; Keesler Field and seafood packing industry centered at Biloxi. In this enterprising area Phillips makes Milk of Magnesia; MacSmith makes shirts; International makes paper; cotton is compressed, naval stores manufactured, pecans processed, tung nuts milled, timber creosoted and many establishments convert raw materials into finished products.

Every form of facility for recreation is provided in this 'Gulf Coast' country-Swimming, bathing, salt and fresh water fishing-Pascagoula, Ocean Springs, Biloxi, Edgewater Park, Mississippi City, Gulfport, Long Beach, Pass Christian and Bay St. Louisexcellent hotels, tourist camps and motor courtsfine food, and an overflowing hospitality: Where else can one find so much for so little?

SILAGE Early May is the time to plant orghum and corn for silage. Eight to ten pounds of Honey sorghur or Atlas-sorgo planted now and fertilized with 400 pounds of mixd fertilizer and side dressed with thirty pounds of nitrogen per acre will make from 10 to 25 tons of silage per acre. Hodo Sorghum also makes good silage but matures

For corn silage, plant a hybrid or a tall growing open-polimated variety. Fertilize just like you would to make 75 busnels per acre and you will have a lot of good glage feed per acre.

COTTON INSECTS

stand and speed the growth. For thrips control, spray or dust when first pair of leaves spread (before chopping). Poison again seven to ten days later. Watch your seedling cotton for cutworm damage. Look for young plants cut off or pulled into the ground. Cutworms usually hide under clods along the drill.

If you notice any cutworm damage, poison; then re-examine cotton in three or four days to see if you get good control.

POULTRY

Do you have a range shelter for your pullets? It is getting about time now that shade is needed. Make sure that you put covers over your range feeders and waterers. This will help keep the feed and water cool during hot days. If the weahter is hot days. And if the weather is rainy, it will save you a lot of

waterers from time to time. Do not let an area become contaminated. Ass soon as an area is grazed down, move the birds.

Make your shelter predatorproof. Stray dogs, foxes, skunks, rats and stray cats all take their tool of young chickens. Do not let them take yours.

"But Why The Candles, **Holy Water And Beads?**

"It looks like hokus-pocus to me," Dave Smith said to Father Crane. Dave was expressing a quite common view held by many non-Catholics ... that the Catholic use of such articles as beads, crucifixes, medals and holy water is unnecessary in religion and even smacks of

pagan superstition. "What good does it do," Dave asked, "to light a candle or burn incense? And how can a little medal around my neck protect me from accidents?"

Unfortunately, too many people outside the Catholic Faith have a complete misunderstanding of these religious articles and the use to which they are put. There is nothing pagan or superstitious about them, and they do have a very real religious meaning and value.

"Actually," Father Crane told Dave, "religious articles used by Catholics are meant to be helps to their religious life-nothing more. The value of such articles is not. in the metal, wood or wax of which they are made, nor in the form they may have ... but in the prayer of the Church and of Christ, in whose name the Church prays in blessing them...as well as the fervor of the user's own prayer and his good disposition." But Dave was still not con-

vinced. He argued that religion is a spiritual thing...that it requires no external manifestations. "Yes," the priest agreed, "it is spiritual. But isn't it the natural thing for a human being to give outward expression to the things within his heart? How, for example, could you be sure that your mother loved

Our Lord, Father Crane added, could have cured the blind man

(John 9:6) merely by willing it. Instead, he first made a salve of clay and anointed the man's eyes. In blessing little children, He did not have to lay His Hands on them - but he did. Many people, Father Crane added, think the Catholic practice of kneeling to pray is unnecessary...yet Jesus, in the Garden of Gethsemane, "kneeling down...began to pray" (Luke

Many Catholic practices which seem strange to you now, would make a deep and convincing impression upon your mind and heart if you really understood them. And this is your invitation to
